"Our earnings remained strong through the third quarter of 2015 with both our reported and core net income at the second highest level in NBT's history," said NBT President and CEO Martin Dietrich. "Our focus on banking fundamentals, including organic loan growth, deposit gathering and asset quality, continues to drive our results. And, the efforts of our employees to provide customers with a full complement of financial services while constantly working to enhance the experience we deliver continues to make them our most important and sustainable asset."

Net interest income was $\$ 64.2$ million for the third quarter of 2015, up $\$ 1.6$ million from the previous quarter, and up $\$ 0.5$ million from the third quarter of 2014 . FTE net interest margin was $3.48 \%$ for the three months ended September 30, 2015, down from $3.51 \%$ for the previous quarter and down from $3.61 \%$ for the third quarter of 2014. Average interest earning assets were up $\$ 159.1$ million, or $2.2 \%$, for the third quarter of 2015 as compared to the prior quarter, and up $\$ 304.0$ million, or $4.3 \%$, from the same period in 2014. The increase from the second quarter of 2015 was driven primarily by organic loan production. Annualized organic loan growth of $6.9 \%$ during the third quarter of 2015 was driven by growth in most portfolios. Yields on earning assets decreased by 2 basis points ("bps") from $3.79 \%$ during the second quarter of 2015 to $3.77 \%$ for the third quarter of 2015. This decrease in yield was more than offset by the growth in earning assets during the third quarter of 2015, and resulted in the $2.6 \%$ growth in interest
income for the third quarter of 2015 as compared to the prior quarter. The yield compression was driven primarily by a 3 bp decrease in loan yields from the second quarter of 2015 to the third quarter of 2015. Average interest bearing liabilities increased $\$ 77.5$ million, or $1.5 \%$, from the second quarter of 2015 to the third quarter of 2015 , which was driven by an increase in short-term borrowings for the third quarter of 2015 due to seasonality of deposits. The rates paid on interest bearing liabilities increased 1 bp from the second quarter of 2015 to the third quarter of 2015 and contributed to the $4.2 \%$ increase in interest expense for the third quarter of 2015 as compared with the prior quarter.

Net interest income was $\$ 189.1$ million for the nine months ended September 30 , 2015, up $\$ 1.2$ million from the same period in 2014. FTE net interest margin was $3.53 \%$ for the nine months ended September 30, 2015, down from $3.61 \%$ for the nine months ended September 30, 2014. Average interest earning assets were up \$208.2 million, or 3.0\%, for the nine months ended September 30, 2015 as compared to the same period in 2014. This increase from last year was driven primarily by $6.6 \%$ annualized organic loan growth during the first nine months of 2015. Yields on earning assets decreased from $3.95 \%$ during the first nine months of 2014 to $3.81 \%$ for the first nine months of 2015 , more than offsetting the growth in earning assets resulting in a $0.6 \%$ decrease in interest income for the nine months ended September 30, 2015 as compared to the same period in 2014. The yield compression was driven by a 17 bp decrease in loan yields from the first nine months of 2014 to the first nine months of 2015. Average interest bearing liabilities decreased $\$ 11.6$ million, or $0.2 \%$, from the nine months ended September 30, 2014 to the nine months ended September 30, 2015. Total average deposits increased $\$ 369.0$ million, or $6.1 \%$, for the nine months ended September 30, 2015 as compared to the same period last year driven primarily by an $11.4 \%$ increase in non-interest bearing demand deposits, as well as increases in money market deposit accounts and savings deposits in the first nine months of 2015. This increase was partially offset by a decrease in average long-term borrowings of $\$ 125.3$ million for the nine months ended September 30, 2015 as compared to the same period last year due to the debt restructuring strategy completed during the third quarter of 2014. In addition, average short-term borrowings decreased $\$ 67.9$ million for the nine months ended September 30,2015 as compared to the same period last year driven by deposit growth. The rates paid on interest bearing liabilities decreased by 6 bps for the nine months ended September 30, 2015 as compared to the same period in 2014. This decrease resulted primarily from a shift in deposits into lower cost core deposits as well as the aforementioned debt restructuring.

Noninterest income for the three months ended September 30, 2015 was $\$ 31.3$ million, up $\$ 3.0$ million from the prior quarter, and up $\$ 4.6$ million from the third quarter of 2014. Excluding the contingent gain recognized totaling $\$ 4.2$ in the third quarter of 2015 from the 2014 sale of Springstone and securities gains, noninterest income for the three months ended September 30, 2015 was $\$ 27.1$ million, down $\$ 1.1$ million from the prior quarter, and up $\$ 0.4$ million from the third quarter of 2014. The decrease from the prior quarter was driven primarily by a decrease in trust revenue, which was down $\$ 0.6$ million due primarily to seasonality.

Noninterest income for the nine months ended September 30, 2015 was $\$ 86.0$ million, down $\$ 13.0$ million from the same period last year. Excluding the gains recorded in both periods from the 2014 sale of Springstone, securities gains, and other items not considered core to our operations, noninterest income for the nine months ended September 30,2015 was $\$ 81.8$ million, up $\$ 2.9$ million, or $3.7 \%$ from the same period last year. The increase from the prior year was driven primarily by increases in retirement plan administration fees, ATM and debit card fees, and other noninterest income. Retirement plan administration fees were up $\$ 0.8$ million, or $9.2 \%$, for the nine months ended September 30,2015 as compared to the same period in 2014 due primarily to new business generation. ATM and debit card fees were up $\$ 0.8$ million, or $6.5 \%$, for the nine months ended September 30, 2015 as compared to the same period last year due primarily to an increase in debit card activity. Other noninterest income was up $\$ 1.5$ million, or $19.1 \%$, for the nine months ended September 30, 2015 as compared to the same period in 2014 due primarily to the acquired loan charge-off recoveries recognized in 2015.

Noninterest expense for the three months ended September 30, 2015 was $\$ 59.9$ million, up $\$ 1.9$ million from the prior quarter and down $\$ 9.2$ million from the third quarter of 2014. Excluding reorganization expenses incurred in the second and third quarters of 2015, prepayment penalties incurred in the third quarter of 2014, and other items not considered core to our operations, noninterest expense was down $\$ 0.9$ million from the prior quarter and up $\$ 1.0$ million from the third quarter of 2014 . The decrease from the prior quarter was due primarily to a $\$ 0.6$ million, or $2.0 \%$, decrease in salaries and employee benefits in the third quarter of 2015, driven by a decrease in medical expenses incurred. Income tax expense for the three month period ended September 30, 2015 was $\$ 10.8$ million, up $\$ 1.0$ million from the prior quarter, and up $\$ 5.2$ million from the third quarter of 2014, which included the impact of the aforementioned non-core items. The increase from the prior period was due primarily to a higher level of taxable income for the third quarter of 2015. The effective tax rate was $35.2 \%$ for the third quarter of 2015 as compared with $33.6 \%$ for the second quarter of 2015, and $33.8 \%$ for the third quarter of 2014.

Noninterest expense for the nine months ended September 30, 2015 was $\$ 175.6$ million, down $\$ 13.8$ million or $7.3 \%$ from the same period in 2014, due primarily to $\$ 17.9$ million in prepayment penalties from long-term, debt restructuring in 2014. Excluding non-core items including these prepayment penalties, reorganization expenses, and other items not considered core to our operations, noninterest expense was up $\$ 3.8$ million, or $2.2 \%$, for the first nine months of 2015 as compared to the same period last year. Salaries and employee benefits were up $\$ 1.6$ million, or $1.8 \%$ for the nine months ended September 30, 2015 as compared with the same period in 2014. Excluding incentive compensation expenses recorded in 2014 related to the Springstone sale, salaries and employee benefits were up $\$ 4.1$ million, or $4.7 \%$, from the first nine months of 2014 to the first nine months of 2015. This increase was driven by higher post-retirement costs, higher medical expenses, and an increase in salaries expense. This increase in salaries and employee benefits was partially offset by a $\$ 1.0$ million decrease in loan collection and other real estate owned expenses for the nine months ended September 30, 2015 as compared to the same period last year. This decrease was due primarily to gains on sales of real estate recorded in the second quarter of 2015, which offset expenses during the period. Income tax expense for the nine month period ended September 30 , 2015 was $\$ 29.7$ million, up $\$ 1.4$ million from the same period in 2014 . The effective tax rate was $34.2 \%$ for the first nine months of 2015 as compared to $33.4 \%$ for the first nine months of 2014.

Annualized net charge-offs to average loans for the third quarter of 2015 was $0.35 \%$, compared with $0.30 \%$ for the second quarter of 2015 and $0.36 \%$ for the third quarter of 2014 .

Past due loans as a percentage of total loans were $0.63 \%$ at September 30, 2015 as compared to $0.61 \%$ as of June 30, 2015 and $0.69 \%$ at December 31, 2014.

The allowance for loan losses totaled $\$ 64.9$ million at September 30, 2015, compared to $\$ 65.0$ million at June 30,2015 , and $\$ 66.4$ million at December

31, 2014. The allowance for loan losses as a percentage of loans was $1.10 \%$ ( $1.21 \%$ excluding acquired loans with no related allowance recorded) at September 30, 2015, compared to $1.13 \%$ ( $1.24 \%$ excluding acquired loans with no related allowance recorded) at June 30, 2015 and $1.19 \%$ ( $1.36 \%$ excluding acquired loans with no related allowance recorded) at December 31, 2014. The decrease in the allowance for loan losses as a percentage of loans from prior periods was due primarily to continued positive trends in asset quality metrics of the originated loan portfolio.
